

README FOR SOCKET HOMEWORK

[link to github](#)

Server Side

資管三,張家豪, B01705008

Instruction

1. Installation

- user make file command (parenthesis is for optional arguments)
- `make`
 - will compile the program directly and run
- `make install`
 - compile the program directly
- `make clean`
 - clean up files

2. Execute

- After `./server`, we just wait for incoming connection and the program handle everything else.

Openssl implementation is included.
